83786

THE ELECTRICAL WORLD:

A WEEKLY REVIEW OF CURRENT PROGRESS IN ELECTRICITY AND ITS PRACTICAL APPLICATIONS.

VOLUME XXXI.

FROM JANUARY 1 TO JUNE 25, 1898.

NEW YORK:

THE W. J. JOHNSTON COMPANY,

9 MURRAY STREET.

INDEX TO VOLUME XXXI.

GENERAL ALPHABETICAL INDEX.

NOTE.—*Entries from the Digest of Current Electrical Literature are indicated by D. (Digest) and D. R. (Digest Reference.) Illustrated articles are indicated by *.*

A

Acceleration on electric railways. By Cravath, (D) 277, 752; Armstrong, (D) 752; Patton, (D. R.) 35; Wright, (D. R.) 35.
Accidents from low-voltage alternating currents, (D.) 161.
Accumulator booster. By Simon, (D.) 224.
Accumulators. By Jaremin, (D.) 309.
  Allan, Description of, (D.) 339, (D. R.) 364.
  Capacity and current, Relation between. By Loppe, (D.) 392, 625.
  Charging for railway service, 185*.
  Chloride, Manchester, Eng., (D. R.) 309.
  Concentration of the acid in. By Dolezalek, (D.) 339.
  Construction of. By Fitz Gerald, (D.) 36, 196, 364, 392, 420, 448, 625, 723; Wade, (D. R.) 36, 364; Weyer, (D. R.) 36.
  Crowdus system, (D.) 448.
  Dentistry, Use in, (D. R.) 198.
  Dry cells, (D) 659.
  Electrodes, Descriptions of. By Weyer, (D. R.) 36.
  Ferryboat service, 349.
  French duty on, (D. R.) 691.
  Fulmen, for traction. By Hospitalier, (D.) 755.
  Future applications of. By Clark, (D.) 101.
  Grids, Different forms. By Wade, (D. R.) 36.
  High tension, Edgerton, 508*.
  Kennedy's new cell, (D.) 364.
  Lamina, Description, (D. R.) 279.
  Lead.
    Chemical theory of. By Darrieus, (D.) 252, 309, 504, 533.
    Manganese di-oxide in. By Knorre, (D. R.) 196.
    Werner system, (D.) 624, (D. R.) 691.
  Lithanode, Making of, (D. R.) 691.
  Manufacture at Dunkinfield, Eng., (D. R.) 252.
  Marschner, (D.) 420.
  Moutered, (D.) 560.
  Plante-Tudor plates, Researches with. By Pfaff, (D.) 338.
  Plates, Manufacture of German specifications, (D.) 102.
  Riley system, (D.) 74.
  Pulvis, Description of. By Miron, (D.) 504.
  Ribbe portable, (D.) 279, 659.
  Sun storage battery. By Fessenden, (D.) 622.
  Testing. By Kennedy, (D.) 36, 131; Appak, (D.) 449.
    Comparative tests, (D.) 420.
    High rate testing. By Kennedy, (D.) 449.
    Methods of testing. By Hospitalier, (D.) 560.
  Theory of. By Elbs and Loeb, (D. R.) 131; Foerster, (D. R.) 226.
  (See also Central stations; Railways, Electric.)
Acetylene. By De Perrodil, (D. R.) 533.
  Danger of impurities in, 93.
  Standard of light. By Fery, (D. R.) 692.
Acme trolley switches, 507*.
Actinograph, Thermo-electric. By Crova, (D. R.) 74.
Actinometer, Electro-chemical. By Rigollot, (D. R.) 250; (D.) 339.
Advertisements, Regarding the "keying" of, 189.
Agriculture, Electricity in. By Meyer, (D. R.) 223; Wurtzler, (D.) 276; Muellendorff, (D.) 788.
Air.
  Discharge action of ultra-violet light. By Zeleny, (D.) 390.
  Electrification of. By Warburg, (D.) 308.
Air compressor, Electric, 761*.
Akron Electrical Mfg. Co., Dynamos, 39*.
Alcohol, Carbide of calcium for preparing. By Yvou, (D. R.) 251.
Alkali percarbonates, Production of, (D.) 131.
Alkali process, Hargreaves-Bird. By Kershaw, (D.) 339, 391; Steinhart and Vogel, (D.) 448.
Alkali works.
  Niagara Falls, (D. R.) 476.
  St. Helens, (D.) 419.
Alkaline haloids, Colored, Cause of. By Wiedeman and Scmidt, (D.) 390.
Alloys.
  Calculation of electric resistance. By Liebenow, (D.) 159; (D. R.) 251.
  Electrical. By Appleyard, (D.) 595, 659.
  Glucinum and copper. By Lebeau, (D. R.) 251.
  Nickel and steel. By Guillaume, (D.) 73.
Alternating-current machinery. By Houston and Kennelly, 124*, 192*.
  Thickness of sheet metal used. By Dittenberger, (D.) 751.
Alternating-current patents, Hunter, (D. R.) 72, (D.) 128, 308, 389; Benfield, (D.) 421.
Alternating-current waves, Determining the harmonic components. By Houston and Kennelly, 580.
Alternating currents.
  Calculation of. By Janet, (D.) 74; (D. R.) 308; Guilbert, (D. R.) 195; Pellat, (D. R.) 691.
  Dangers from, (D.) 253.
  Fatalities from low-voltage currents, (D.) 161; Kolben, (D.) 198.
  Frequency of, Determining. By Kinsley, (D.) 504.
  Graphical calculation of. By Guye, (D.) 363, (D. R.) 476, 755.
  Regulating line voltage, (D.) 753.
  Regulation of, Steinmetz and Rice patents, 218*.
  Substitution for direct currents, 2.
  Theory of. By Rhodes, (D.) 159, 225, 363, (D. R.) 476; Fry, (D. R.) 659.
Aluminum.
  Coating, (D. R.) 560.
  Galvanic deposits of, (D.) 131.
  Impurities in. By Defacoz, (D. R.) 197.
  Manufacturing aluminum and its sulphides. By Peniakoff, (D.) 391.
  Plated. By Sattler, (D.) 101.
  Producing high temperatures with aluminum. By Goldschmidt, (D.) 660, (D. R.) 693.
  Rival of copper for electrical conductors, (D.) 477; By Hunt, 270, 559.
Ambroin, a new insulating material. By Montpellier, (D.) 253.
American Bell Telephone Co., Annual report, 445, 461.
American Institute Electrical Engineers, Omaha meeting, 784.
American Lithographic Company, Electric plant, (D.) 129, (D. R.) 73.
Amperemeter, Thermic mercury. By Camichel, (D.) 310, 625.
Analysis, Electrolytic. By Arth, (D. R.) 533.
Antimony and tin, Electrolytic separation. By Ost, (D. R.)36, 102.
Aqueous solutions, Electrolytic decomposition, (D. R.) 102, 392, 504.
Arc lamp hanger, "H. W. J.," 395*.
Arc lamps.
  Candle power of. By Marks, (D.) 276.
  Enclosed.
    Action of enclosed arcs. By Fraley, (D.) 157.
    Advantages for series circuits. By Hallberg, 387.
    Cleaning globes. By Carhart, 552; Hallberg, (D.) 622.
    Discussion. By Marks, (D. R.) 71.
    Factory use of, 505.
    Improvements. By Richard, (D. R.) 307.
    Jandus. (See below, Jandus enclosed.)
    New design, 450*.
    Principles. By Freedman, (D.) 128.
    "Strela" lamp, (D.) 473.
  Freezing, Prevention of. By Fowden, (D.) 276.
  Heat compensator for, (D.) 721.
  Henrion alternating, (D. R.) 194.
  Hoisting gear, (D. R.) 531.
  Jandus enclosed, 41*, 507*; By Barton, (D. R.) 558.
    Photometric tests. By Wedding, (D.) 71; Sohlman, (D.) 99, 751.
  Manhattan types, 762*.
  Mercury. By Arons, (D.) 130, 448.
  Regulator, Induction motor, 305*.
  Standard enclosed alternating current, 46*.
  Various, (D. R.) 276.
  "Wood" long-burning, 254*.
Arc lighting. (See Lighting, Electric.)
Arcs.
  Aluminum, Counter E. M. F. of. By Lang, (D.) 363.
  Arc in liquids. By Bredig, (D.) 754.
  Counter E. M. F., (D.) 130, 224. By Fleming, (D.) 159.
  Herzfeld's researches, (D.) 34.
  150,000-volt, Steinmetz experiments, (D.) 35.
  Open vs. enclosed, 433.
  Polarization of electrodes. By Lang, (D.) 225.
  Researches with. By Sahulka, (D.) 658.
  Telephone phenomenon. By Simon, (D.) 447.
Arcs. (Continued.)
  Theory of the electric arc. By Jamieson, (D.) 308.
  Transformation of energy, 243, (D.) 224.
Argon, Behavior of, in X-ray tubes. By Callendar and Evans, (D. R.) 196.
Armautre bolts, Uninsulated. By Fischer-Hinnen, (D.) 501; Boucherot, (D.) 721.
Armature disc notching press, Bliss, 228*.
Armature discs, Small, Mianus Co., 103*.
Armatures.
  Alternator. By Houston and Kennelly, 192*.
  Construction, General Electric Co., 506*.
  Magnetization of a core covered only partly with coil. By Sauter, (D.) 196.
  Reaction. By Bessey, (D.) 656.
  Slotted and smooth cored. By Bell and Fennell, (D.) 194.
  Windings, (D.) 223, 446; By Hanchett, (D. R.) 362, 389; Menges, (D.) 501; Rice, (D.) 307, (D. R.) 501, 622.
Armitage-Herschell Co., Electrical apparatus, 421*, 565*.
Atomic magnetization, By Jaeger and Meyer, (D.) 225.
Aurora, Nature and altitude of. By Abbe, (D. R.) 503.

B

Balance, Permeability, for workshop tests. By Ewing, (D.) 692, 723*.
Baldwin Locomotive works, Electric distribution of power, 644.
Balloon observations, Electric. By Boernstein, (D.) 132.
Batteries.
  Air as a depolarizer. By Lavison, (D.) 36.
  Aluminum electrode cell. By Dina, (D.) 789.
  Cadmium. By Wachsmuth and Jaeger, (D. R.) 132.
  Carbon. By Borchers, (D. R.) 74; Pauling, (D.) 226, 595; Blumenberg, (D.) 364; Reed, (D.) 448.
    Thermo-chemical theory. By Tommasi, (D.) 364.
    (See also below, Jacques.)
  Clark standard cell. By Dearlove, (D.) 197.
    Cadmium amalgam in. By Jaeger, (D.) 756.
    Change of zinc sulphate. By Jaeger, (D.) 392.
    Permanency of. By Cooper, (D.) 504.
    Variations in the E. M. F. By Spiers, (D. R.) 504.
  Coal solution for primary batteries. By Whittemore, (D.) 364.
  Dry cells.
    Behavior of. By Wolcott-Helat, (D.) 392.
    Internal resistance. By Wynne, (D.) 504.
    Tests of. By Knorre, (D. R.) 226.
  Energy in the cells. By Tommasi, (D.) 790.
  Experimental apparatus, 716.
  Galvanic.
    Chemical processes in. By Heil, (D.) 252.
    Resistance of, Measuring. By Haagu, (D.) 595.
  High voltage, Experiments with. By Trowbridge, (D.) 160, (D. R.) 278.
  Jacques, D.) 691; By Ostwald, (D.) 131; Reed, (D.) 131, 392; Anthony, (D.) 309; Thomsen, (D.) 309.
  Leclanché cells, Improvement in, (D.) 196, 625.
  Oxide of copper, Improved, (D.) 131, (D. R.) 196.
  Precipitation. By Lorenz, (D.) 196; Vogel, (D.) 392.
  Primary, Stubblefield form, 757*.
  Reversible cells. By Darrieus, (D.) 252, 309, 504, 533, 560.
  Temperature compensation of standard cells. By Campbell, (D.) 102, (D. R.) 392.
  Testing set. By Hobart, (D.) 756.
  Thermo-electric. By Reed, (D. R.) 625.
    Novel form, 546.
  Water, Construction of. By Longden, 681*.
  (See also Electricity, Production.)
Battery transfer carriage, 185*.
Beacon, Electric, Testing an enormous, 96*.
Bearings for electrical machinery. By Fells, (D. R.) 446.
Becquerel rays, Properties of. By Stewart, (D.) 691.
Bells, Electric. By Eastlake, (D. R.) 393.
  Arrangement in residence. By Tompkins, (D.) 310.

Bells, Electric. (Continued.)
Electric Mfg. Co., 478*.
Improved design, 626*.
Bells for electric light circuits, 313*.
Belts, Schieren electric, 316.
Belts for power transmission, 424*.
Berliner patent. (See Telephony.)
Biographical sketches.
Cecil, Lord Sackville Arthur, (D. R.) 279.
Dwight, H. P., (D. R.) 161.
Ferguson, L. A., (D. R.) 280.
Gramme, Zenobe, (D. R.) 505.
Halske, J. G., (D. R.) 103.
Kerl, Bruno, (D. R.) 75.
Schnabel, Carl, (D. R.) 75.
Siemens, W. V., (D. R.) 103.
Strong, C. W., (D. R.) 279.
Swan, Joseph W., (D. R.) 198.
Tschikoleff, W. N., (D. R.) 597.
Webb, Francis Hughes, (D. R.) 161.
Wietlisbach, Dr. J. Victor, 28, (D. R.) 75, 340.
Bismuth.
Resistivity of. By Van Aubel, (D.) 130, 475, 658.
Transparency in magnetic field. By Buisson, (D.) 363, 503.
Bit for electrical work, Cleveland, 256*.
Blast furnace gas, Belgian furnace. By Greiner, (D. R.) 752.
Blast furnace gases for electric power, Utilization of, (D.) 689; By Booth, (D.) 592, 656, 752; Twaite, (D. R.) 689.
Blasting fuses, Firing. By Francis, (D. R.) 132; Sterling, (D. R.) 132.
Blindness from the electric arc. By Rowland, (D. R.) 393.
Bliss Company.
Armature disc notching press, 228*.
Double crank press, 627*.
Straight-sided press, 478*.
Boats.
Mooring, by electro-magnetism, 451*.
Submarine, 490.
Holland, (D.) 473.
Wrecking boats, (D.) 132.
Boilers.
Low-water alarm, Ingenious, 163.
Mechanical vs. natural draft, 165*.
Volatile oils in, Properties of. By Edgar, 155.
Bolometer. By Langley, (D.) 504; Belloc, (D.) 756.
Book reviews.
Alternating-current Phenomena, Theory and Calculation of. By Steinmetz, 162.
Dictionary of Electrical Words, Terms and Phrases. By E. J. Houston, 38.
Electric Toy Making for Amateurs. T. O'C. Sloane, 103.
Electricity in Electro-Therapeutics. Houston and Kennelly, 198.
Elektromechanische Konstruktionen. Gisbert Kapp, 253.
Elementary Principles of Machine Design. J. G. A. Meyer, 198.
Engineering and Architectural Jurisprudence. J. C. Wait, 198.
First Principles of Electricity and Magnetism. C. H. W. Biggs, 198.
Index to the Electrical World, 1883 to 1897, 38.
Induction Coil in Practical Work. Lewis Wright, 198.
International Electric Library, 162.
Lecons sur l'Electricité. Eric Gerard, 253.
Pocket Dictionary of Electrical Words, Terms and Phrases. E. J. Houston, 253.
Potentiometer and its Adjuncts. W. C. Fisher, 253.
Practical Calculation of Dynamo-Electric Machines. By A. E. Wiener, 38.
Practical Electricity. W. E. Ayrton, 198.
Principles of Alternate-Current Working. Alfred Hay, 198.
Shop and Road Testing of Dynamos and Motors. By Parham and Shedd, 162.
Switchboards, Modern. A. B. Herrick, 534.
Theory of Electricity and Magnetism. C. E. Curry, 198.
Transmissioni e Distribuzioni Polifasi. Riccardo Arno, 103.
Transportable Akkumulatoren. Johannes Zacharias, 340.
Universal Electrical Directory, 450.
With Mallet and Iron. Wilhelm Bersch, 253.
Wright's Trade Directory and Gazetteer for Australia, India, China and Japan, 253.
Boosters.
Accumulator. By Simon, (D.) 224.
Central stations, Economical arrangement, (D. R.) 593.
Chicago lines, (D.) 73.
Economy of. By Woodbridge, (D.) 362.
Object and uses in railway circuits. By Woodbridge, (D.) 362, 593.
Borides, Formation and properties of. By Moissan and Williams, (D. R.) 420.
Brakes.
Magnetic, on Dresden railways. By Kubierschky, (D.) 531.
Prony, Motor testing, (D.) 309.
Bronzes.
Analysis of. By Hollard, (D. R.) 339.
Coloring, Lissmann process, (D.) 560.
Brooklyn Bridge.
Car counter, (D.) 227, 310.
Electrolysis, 3; By Farnham, (D.) 224.
Trolley car service, 177, 179*, (D. R.) 158.
Brown, Boveri & Co., Electrical machinery. By Levin, 58, 59*, 87*.
Brush Electric Co., Baltimore, System of, 267*.
Brush holders, Carbon. By Scott, (D.) 592, 656.
Brushes, Woven wire, 507*.
Bryan-Marsh Mfg. Co. Incandescent lamps, 42*.
Buildings.
Philadelphia City Hall tower, Electroplating, 471.
Buildings. (Continued.)
Steel frame, Effect of electricity on, (D.) 227, 279, 534.
Bullets in the brain, Locating, (D.) 74.
Bullock direct-connected generators, 451*.
Buoys.
Isolated electrically lighted, 274*.
Water power, Fletcher system, (D.) 360.
Burglar alarm circuits, Telephone connections for. By Ruther, (D. R.) 132.
Burglar-proof safe, St. Augustine's Church, Brooklyn, 96*.

C

C & C Electric Co., Motor, 228*.
Cable railway, Wash., D. C., Changing to conduit system, (D. R.) 307.
Cable repair ship, Japanese, (D.) 340.
Cables.
Air insulation. By Barbarat, (D.) 447, 532, (D. R.) 690.
Capacity of coiled cables. By Dearlove, (D.) 533.
Capacity relations in. By Andriessen, (D.) 131.
Capacity tests of. By Raymond-Barker, (D.) 561.
Concentric insulation. By Andriessen, (D.) 362.
Concentric thermostat, 43*.
Electrostatic capacity of two-wire cable. By Patterson, (D.) 160.
Fire alarm, (D.) 75.
History of electrical conduits and cables. By Dow, (D. R.) 73.
Iron or copper lightning conductors, (D.) 362.
Testing cable joints. By Raymond-Barker, (D.) 660.
Thermostatic electric, 535.
(See also Telegraph cables.)
Cadmium and iron, Separation of. By Stortenbeker, (D. R.) 420.
Calcium carbide.
Cost of making, (D. R.) 595.
Lynchburg, Va., plant. By Temple, (D.) 533.
Neuhausen and Bitterfeld plants, (D.) 102.
Use of. By Moissan, (D. R.) 251.
Calcium carbide patents. By Fraser, (D.) 226.
Calcium chlorides, Electrolysis of. By Bischoff and Foerster, (D.) 595.
Calibrating ammeters or electro-dynamometers. By Carhart, 383.
Camden water wheels, 480*.
Canadian Electrical Association, 781.
Canal rays.
Deflection of. By Wien, (D. R.) 723.
Effect of, on electrical properties of discharge tubes. By Wiedemann and Schmidt, (D.) 130.
How obtained. By Goldstein, (D.) 390.
Canals, Electric traction.
Champlain, (D. R.) 277.
Erie canal, 434, (D.) 447.
Leland system, (D.) 73.
Shewring system, (D.) 73.
Candlesticks, Magical. By Hopkins, (D.) 310.
Capacity, Measuring with balance. By Lang, (D. R.) 102, 421.
Capillary electrometer. By Behn, (D. R.) 476.
Car brakes.
Magnetic, Dresden railways. By Kubierschky, (D.) 531.
Prony, Motor testing, (D.) 309.
Car heating, Electric. By Verole, (D.) 277.
Tests in Chicago, 310.
Car lighting, Electric.
Accumulator system. By Dick, (D.) 622.
European practice, (D. R.) 337, 592, 751.
France, Northern Ry., (D.) 128.
German experience, (D.) 360.
Glasgow plant, (D. R.) 277, 418, 447.
Carbides, Preparation of. By Moissan, (D.) 131, 392.
Carbon.
Electro-chemical equivalent. By Coehn, (D.) 279.
Heat and electric conductivity. By Cellier, (D. R.) 250, 476.
Carbon brush holders. By Scott, (D.) 592, 656.
Carbon detector for Hertz waves. By Jervis-Smith, (D. R.) 74.
Carbons.
Manufacture of. By Jehl, (D.) 279, 366, 534.
Use of carbon stumps, (D.) 337.
Card Electric Co., 225-kw generator, 566*.
Care of electrical machinery. By Baxter, (D) 34.
Cars, Electric.
Accumulators.
Berlin, (D.) 129, (D. R.) 194.
Chicago, (D.) 129, 390.
New York service, (D.) 474.
Double-deck.
Chicago, (D. R.) 35.
Paris, (D. R.) 474.
Mixed trolley and accumulator, Paris, (D. R.) 558.
Oscillation of cars. By Uebelacker (D. R.) 593.
Patton motor, (D.) 532.
Sanding car, 386*.
Sprinkling car, 367*.
Tower, Electric railway construction, 760*.
Cartwright air-tight fuses, 163*.
Cashiers' Electric Safety Cabinet Co., Cash drawer and cabinet, 44*.
Cathode ray lamp. By Swinton, (D.) 721.
Cathode rays. By Lamotte, (D. R.) 35; Wiedemann and Schmidt, (D.) 338; Villard, (D.) 338, 560, 723; Ebert, (D. R.) 723; Jaumann, (D.) 723.
Action on air. By Lenard, (D.) 594.
Action on insulated conductors. By Battelli and Garbasso, (D.) 691.
Cathode rays. (Continued.)
Analogy with Röntgen rays. By Battelli, (D.) 278.
Canal rays. (See Canal rays.)
Charging with. By Majorana, (D. R.) 419.
Coloration of haloids. By Wiedemann and Schmidt, (D. R.) 532.
Deflection. By Kaufmann, (D.) 251; Schmidt, (D. R.) 624.
Deflection in oscillating fields, (D.) 789.
Electrostatic property of. By Lenard, (D. R.) 594.
Effect of rays on air. By Lenard, (D.) 225.
Historical view. By Perrine, (D.) 251.
Homogeneous. By Deslandres, (D. R.) 250.
Mutual influence of. By Bernstein, (D.) 250; (D. R.) 362.
Nodular. By Wiedemann and Wehnelt, (D.) 532.
Properties, in powerful magnetic field. By Broca, (D.) 475.
Radiation, Nature of. By Lenard, (D.) 475.
Resistance of the cathode space. By Wiedemann, (D.) 278.
Röntgen rays in. By Roiti, (D.) 475.
Salts altered by rays. By Abegg, (D.) 130, 390.
Species of. By Wiedemann and Schmidt, (D.) 130.
Spectrum of. By Birkeland, (D.) 363.
Velocity of. By Majorana, (D. R.) 250, 448, 790; Des Coudres, (D.) 594.
X-rays in the cathode beam. By Roiti, (D.) 789.
Central stations.
Accumulators.
Advantages of, (D. R.) 338, (D.) 789.
Auxiliaries, Pittsburg, (D.) 158.
Chicago Edison Co., 726*, (D.) 277.
Fribourg station. By Ritter, (D.) 362, (D. R.) 475.
Alternating currents, General distribution by. By Wagner, 740; Dow, 740.
Arc lamps from alternating-current stations, (D.) 128.
Baltimore.
Brush Electric Co., 267*.
Economy test, 549.
Berlin, Notes, (D.) 195.
Bi-phase installations in France. By Ritter, (D. R.) 249; Ziegler, (D. R.) 249.
Boilers, Marine, Use of, (D. R.) 128.
Booster, Economical arrangement, (D. R.) 593.
Bradford, Eng., (D. R.) 73, 277.
Breslau, Operation 1896-7, (D. R.) 447.
Bristol Ry. Co., Analysis of accounts, (D. R.) 502.
Brockton, Mass., Tests, 493.
Brooklyn, Edison Electric Illuminating Co., (D.) 754; By Wetzler, (D.) 129.

Osmotic pressure and electrolytic dissociation. By Compton, (D.) 102; Traube, (D. R.) 420.
Owens, R. B. Electricity in municipal engineering, 151.
Oxygen.
Curative action of. By Andreoli, (D.) 505.
Electrolytic. By Hammerschmidt and Hess, (D.) 533, 560.
Oxygen compounds of metals, Production of. By Otto and Strecker, (D.) 624.
Ozone.
Curative action of. By Andreoli, (D.) 505.
Formation of. By Shenstone and Evans, (D.) 392; Andreoli, (D.) 476.
Manufacture of. By Andreoli, (D. R.) 253.
Ozonizers, Andreoli forms, (D.) 38, 103, 693.

P

Paper manufacture.
Electric motors, Use of. By Bell, 265, 269.
Portland, Me., Cumberland Mills, 274.
Patent law, Japanese, 218.
Patent Office, U. S.
Change in laws, 66.
Relic from, 33.
Small working force, 336.
Patents.
British electrical, (D. R.) 161.
Conduit controller, Decisions, 670.
Hunter alternating current patent, (D. R.) 72, (D.) 128, 308, 389; Belfield, (D.) 421.
Lord Kelvin's, List of, (D.) 366.
Motor suspension, Decisions, 178, 248, 670.
Report of U. S. Commissioner, 381.
Telephone switchboard, Scribner. By West, (D. R.) 310.
Van Depoele trolley decision, 238, 461.
Peat, Utilization of, in Germany. By Frank, (D.) 223, 622.
Perchlorates, Formation of. By Winteler, (D.) 595.
Perpetual motion of the second degree. By Frank, (D.) 195.
Pettingell, Andrews Co., 599*.
Phase differences, Measuring. By Martiensen, (D.) 365, 420; Rossi, (D. R.) 724, 756.
Phase shifting. By Schulz, (D. R.) 594.
Phase splitting device, (D.) 657.
Phonograph, Electrolytic, (D.) 279.
Phosphorescence by electrification. By Trowbridge and Burbank, (D.) 101.
Phosphorus, Manufacture of, (D.) 533.
Photo-electric phenomena. By Luggin, (D.) 225; Schmidt, (D. R.) 250.
Photographic investigation of a 150,000-volt discharge. By Steinmetz, 294*, sup.
Photography, Vacuum tube lighting. By Tesla, (D.) 99.
Photometer, New electric light, 759*.
Photometry.
Central station department. By Speed, 440; Howell, 556.
Flicker method. By Tufts, (D.) 161, (D. R.) 226; Rord, (D.) 791.
Measuring mean horizontal candle-power. By Mathews, (D.) 252.
Pictures, Electric transmission of, 441, (D.) 450, 505, 561. By Dussand, (D.) 724.
Planimeter, Richard, for record curves, (D.) 476.
Plants, Action of Röntgen rays on. By Atkinson, (D.) 130, (D. R.) 278; Tolomei, (D.) 338, 390; Maldiney and Thouvenin, (D.) 419.
Platinum chloride, Electrolysis of. By Kohlrausch, (D.) 309.
Plows, Electric, Germany. By Muellendorff, (D.) 788.
Polarization.
Measuring capacity. By Gordon, (D. R.) 392.
Theory of. By Oberbeck, (D.) 225, 392, 533.
Polarization of light in the magnetic field. By Lorentz, (D.) 338.
Polarization of thin membranes. By Nernst and Scott, (D.) 364.
Poles for trolley lines, (D. R.) 532.
Old rails, Rochester. By Nicholl, (D.) 593.
Potassic iodide and starch paper. By Gruetzner, (D.) 75.
Potential gradients in vacuum tubes. By Graham, (D.) 390.
Potentials.
Exploring potential around the commutator. By McKissick, (D.) 389.
Graphical representation. By Goerges, (D.) 448.
Mechanical computator of fall of. By Browne, Jr., 610.
Soft iron in high frequency coils. By Pellat, (D.) 476.
Potentiometer, W. C. S., New form, (D. R.) 279.
Potter's wheel, Ancient and modern, 295*.
